Auckland | NZ citizen | *021 648 286* | *james1412049013@gmail.com* | *@LinkedIn* | *@GitHub*

Skills

Languages : Java, Python, JavaScript, TypeScript, C#
Frameworks : Ionic Angular & React, .NET Core, Flask, Jasmine, Cypress, JMeter
Others : RESTful API, Machine Learning, Agile development, Docker, CI/CD pipelines, Linux

Education

Bachelor of Engineering (Honours) | *The University of Auckland* *2021 – 2024*

- Received specialization invitation letter from Mechanical and Mechatronics department.
- Dean's Honours List 2024 (top 5% students).
- Published final year research paper: "Real-Time Learning-Based Gesture Generation for Pepper Robot Using Audio" on Australasian Conference on Robotics and Automation (ACRA 2024).

Experience

Graduate Research Assistant | *The University of Auckland* *12/2025 – Now*

- Designed cross-platform dementia care mobile app using Ionic React and Tailwind, with AI-driven interactions from chatbot agent.
- Researched dementia behaviours from academic paper to guide evidence-based content design.

Full-stack Developer | *Loadrite* *11/2024 – 02/2025*

- Built and integrated AI chatbot with tour-guide navigation into Ionic Angular-based web app.
- Researched and evaluated LLM and ML approaches of building chatbot, recommending and deliverying a cost-effective ML solution after presenting tradeoffs to stakeholders.
- Developed .NET Core API gateway and ensured codebase reliability through Jasmine and Cypress testing.
- Delivered project milestones using Agile practices, exceeding documentation and presentation expectations.

Summer Research Assistant | *The University of Auckland* *11/2023 – 02/2024*

- Developed robotic device management web app using React and Flask with Firebase and RESTful APIs.

Private Tutor *11/2023 – 02/2024*

- Delivered one-on-one Python tutorial for primary school student by organizing age-appropriate learning materials.

Part I Engineering Mentor | *The University of Auckland* *07/2023 – 10/2023*

- Supported first-year engineering students through academic mentoring and peer guidance.

Metaverse SDK And Server Developer | *DigiSomni* *11/2022 – 01/2023*

- Built and deployed multiplayer application servers using Docker.
- Contributed to weekly agile planning and produced handover documentation.

Projects

@Personal Website *06/2024*

- Designed and deployed responsive Angular portfolio website on Vercel

@Enhancing Human Motion With Flexible Style Control *03/2024 – 10/2024*

- Trained and deployed GAN-based models on Pepper Robot for real-time co-speech gestures.
- Led and managed planning with Trello and biweekly reporting.

@Pendulum *11/2022 – 02/2023*

- Co-developed Java desktop application for warehouse management.
- Implemented OAuth-based authentication alongside two-factor email verification.
- Communicated with stakeholders and elicited requirement alignment.

Volunteer

Front Counter Translator & Assistant | *NZ Police* *09/2025 – Now*

- Provided Mandarin-English translation services to support communication with public and helped organize chore tasks.

Epsom Community Patroller | *CPNZ* *05/2025 – Now*

- Community Patrols of New Zealand, worked with the NZ Police and other organizations to create safer communities.

Retail Assistant | *SPCA* *05/2025 – Now*

- Assisted customers with clothing selections; handled donations and provided excellent retail service.
