Skills

Languages : JavaScript, TypeScript, Python, Java
Frameworks : Ionic Angular & React, Flask, Tailwind, Jasmine, Cypress
Tools : RAG pipeline, LLM, Firebase, RESTful API, Docker, CI/CD pipeline

Education

Bachelor of Engineering (Honours) | *The University of Auckland* *2021 – 2024*

- Granted specialization invitation letter from Mechanical and Mechatronics department.
- Dean's Honours List 2024 (top 5% students).
- Published final year research paper on Australasian Conference on Robotics and Automation (ACRA 2024).

Experience

Migration Research Assistant | *The University of Auckland* *04/2026 – Now*

- Led migration of monorepo prototype by separating backend to cloud-hosted services and extending frontend into cross-platform mobile/tablet app.
- Contributed in weekly meetings while managing multiple research tasks and supporting ongoing improvements.

Dementia Research Assistant | *The University of Auckland* *12/2025 – Now*

- Developed cross-platform dementia care mobile app (iOS/Android) with translated WHO supports.
- Built frontend with Ionic React and Tailwind integrated Firebase for authentication and data management.
- Implemented Flask backend to connect frontend and built RAG pipeline-based chatbot.
- Deployed services on Render for reliable cross-platform access.

Full-stack Developer | *Loadrite* *11/2024 – 02/2025*

- Implemented tour-guide navigation and integrated chatbot into Ionic Angular-based quarry management web app.
- Evaluated LLM/ML approaches with cost-effective solution conducted through tradeoffs analysis.
- Ensured codebase reliability through Jasmine and Cypress testing.
- Delivered project milestones with Agile practices, exceeding documentation and presentation expectations.

Summer Research Assistant | *The University of Auckland* *11/2023 – 02/2024*

- Developed React-based robotic device management web app with Flask, Firebase, and RESTful APIs.

Private Tutor *11/2023 – 02/2024*

- Delivered one-on-one Python tutorial for primary school student by organizing age-appropriate learning materials.

Part I Engineering Mentor | *The University of Auckland* *07/2023 – 10/2023*

- Supported first-year engineering students through academic mentoring and peer guidance.

Metaverse SDK And Server Developer | *DigiSomni* *11/2022 – 01/2023*

- Built and deployed multiplayer application servers using Docker with weekly planning engaged.

Projects

@Personal Website *06/2024*

- Designed and deployed responsive Angular-based portfolio website on Vercel with CI/CD pipeline.

@Enhancing Human Motion With Flexible Style Control *03/2024 – 10/2024*

- Trained and deployed GAN-based models on Pepper Robot for real-time co-speech gestures.
- Led and managed planning with Trello and biweekly reporting.

@Pendulum *11/2022 – 02/2023*

- Co-developed Java desktop application for warehouse management and communicate with stakeholders to ensure requirement alignment.

Volunteer

Front Counter Translator & Assistant | *NZ* Police *09/2025 – 02/2026*

- Provided Mandarin-English translation to support public while maintaining well-organized work environment.

Community Patroller | *CPNZ* *05/2025 – 02/2026*

- Community Patrols of New Zealand, worked with the NZ Police and other organizations to create safer communities.

Retail Assistant | *SPCA* *05/2025 – 02/2026*

- Assisted customers with clothing selections; handled donations and provided excellent retail service.
